Subject: Sequence search 09/960,143

Hi David,

I need to order a "length over score" nucleotide sequence search on nucleotides 391 to 1639 of SEQ ID NO:3 (1639 nt long) in the above entitled case. I need the lower and upper limits to be 8 and 50, respectively, I need those hits complementary to the 70% level, and please transfer as many hits into the excel program as possible. I do not need the interference databases searched.

Thanks,

Doug Schultz

Voluntary Results Feedback Form

➤ *I am an examiner in Workgroup:* *Example: 1610*

➤ *Relevant prior art found, search results used as follows:*

- 102 rejection
- 103 rejection
- Cited as being of interest.
- Helped examiner better understand the invention.
- Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- Foreign Patent(s)
- Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ *Relevant prior art not found:*

- Results verified the lack of relevant prior art (helped determine patentability).
- Results were not useful in determining patentability or understanding the invention.
